DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-6 in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 7 and 8 are drawn to non-elected subject matter thus the examiner is withdrawing them from further consideration.

The requirement is still deemed to be proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Mosesson et al.

On column 8, lines 16-33, the reference teaches calcium chloride and acetic acid.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Baumbach et al.

The reference in example 3 teaches thrombin, calcium chloride, PEG and a buffer. It also teaches acetic acid.

Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hemker (example), Uriyu et al. (col. 9), Ogawa et al. (col. 4), Winant et al. (col. 8), or JP 05017369 (abstract).

The references teach thrombin, calcium chloride, PEG, organic acids and buffers.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mosesson et al.

Art Unit: 1654

On column 8, lines 16-33, the reference teaches calcium chloride and acetic acid.

It is obvious to use the combination of ingredients since they are used together.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baumbach et al.

The reference in example 3 teaches thrombin, calcium chloride, PEG and a buffer. It also teaches acetic acid. It is obvious to use the combination of ingredients since they are used together.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hemker (example), Uriyu et al. (col. 9), Ogawa et al. (col. 4), Winant et al. (col. 8), or JP 05017369 (abstract).

The references teach thrombin, calcium chloride, PEG, organic acids and buffers. It is obvious to use the combination of ingredients since they are used together.
